

CLINICAL PRACTICE GUIDELINES IN DENTISTRY: THE BEST CARE YOU CAN PROVIDE

COURSE DESCRIPTION

This course offers in-depth information on Evidence-Based Dentistry (EBD) and its pivotal role in clinical decision-making. Attendees will gain a solid foundation in the principles of EBD, including how to evaluate different study designs and interpret clinical practice guidelines to enhance patient care. The course will address the relevance of guidelines in dentistry and familiarize attendees with existing recommendations that impact clinical practice. This course will equip dental professionals with the skills to integrate evidence-based principles into daily patient care.

COURSE OBJECTIVES

1. Define Evidence-Based Dentistry.
2. Understand different study designs.
3. Explain the relevance of clinical practice guidelines.
4. Identify and apply guidelines in dentistry.

SPEAKER

Dr. Elliot Abt
D.D.S., M.S., M.Sc

Elliot Abt, D.D.S., M.S., M.Sc. received a master's degree in oral pathology and dental degree from the University of Illinois. Dr. Abt completed his dental residency training at Ravenswood and the University of Illinois Hospitals. From 1989-2004, Dr. Abt was the director of the dental residency programs at Ravenswood and Illinois Masonic Medical Center. He then received a master's degree in evidence-based healthcare from Oxford University. Dr. Abt is an adjunct associate professor of oral medicine at the University of Illinois and directs the journal club for dental residents at Illinois Masonic Medical Center. He teaches research methodology and biostatistics at the American Dental Association (ADA) Advanced Evidence-based Dentistry (EBD) Workshop. Dr. Abt has co-authored several ADA Clinical Practice Guidelines and is an instructor in the ADA EBD Faculty Development Workshops. Dr. Abt is a past-chair of the ADA Council on Scientific Affairs and maintains a private practice in general dentistry.
