

# PERIODONTOLOGY AND IMPLANT MAINTENANCE FOR GENERAL PRACTICE

## WHAT YOU'LL LEARN

This course is designed for dental professionals and delivers critically appraised, evidence-based strategies for accurate periodontal and peri-implant diagnosis. It provides a chronological overview of the assessment phase of care, including identifying, diagnosing, communicating, treating, and stabilizing periodontitis through non-surgical periodontal therapy. The course will also review the latest 2023 implant maintenance guidelines, focusing on prevention, early detection, and management of peri-implant conditions.

## Course Objectives

- Describe the components of a comprehensive periodontal assessment phase.
- Apply the 2017 AAP/EFP classification system to stage and grade periodontitis.
- Differentiate between periodontal and peri-implant disease classifications.
- Develop evidence-based treatment plans for patients with periodontal and implant conditions.
- Utilize a clinical decision-making framework for periodontal diagnosis and treatment sequencing.
- Identify efficient instrument setups for scaling and root planing and basic recall kits.

## Course Outline

- Assessment Phase Components
- Periodontal Classification
- Implants Classification
- Implants Maintenance
- Treatment Planning
- Decision Making Tree
- Glycine Powder Air Polishing
- Set up for Basic Kit
- Set up for SRP kit

## SPEAKER

### Dr. Silky Sharma RDH, Ed.D

Dr. Silky Sharma, RDH, Ed.D is an Associate Professor and an international CE speaker with over 22 years of clinical experience in a perio-focused practice. She specializes in periodontology for dental hygienists, advanced periodontal instrumentation, evidence-based care, and scientific literature.
