

PERIODONTOLOGY AND IMPLANT MAINTENANCE FOR GENERAL PRACTICE

WHAT YOU'LL LEARN

This course is designed for dental professionals and delivers critically appraised, evidence-based strategies for accurate periodontal and peri-implant diagnosis. It provides a chronological overview of the assessment phase of care, including identifying, diagnosing, communicating, treating, and stabilizing periodontitis through non-surgical periodontal therapy. The course will also review the latest 2023 implant maintenance guidelines, focusing on prevention, early detection, and management of peri-implant conditions.

Course Objectives

- Describe the components of a comprehensive periodontal assessment phase.
- Apply the 2017 AAP/EFP classification system to stage and grade periodontitis.
- Differentiate between periodontal and peri-implant disease classifications.
- Develop evidence-based treatment plans for patients with periodontal and implant conditions.
- Utilize a clinical decision-making framework for periodontal diagnosis and treatment sequencing.
- Identify efficient instrument setups for scaling and root planing and basic recall kits.

Course Outline

- Assessment Phase Components
- Periodontal Classification
- Implants Classification
- Implants Maintenance
- Treatment Planning
- Decision Making Tree
- Glycine Powder Air Polishing
- Set up for Basic Kit
- Set up for SRP kit

SPEAKER

Dr. Silky Sharma RDH, Ed.D

Dr. Silky Sharma, RDH, Ed.D is an Associate Professor and an international CE speaker with over 22 years of clinical experience in a perio-focused practice. She specializes in periodontology for dental hygienists, advanced periodontal instrumentation, evidence-based care, and scientific literature.
