

PERIODONTOLOGY, IMPLANT MAINTENANCE, AND AIRWAY-CENTERED CARE FOR GENERAL PRACTICE

WHAT YOU'LL LEARN

This course is designed for dental professionals and delivers critically appraised, evidence-based strategies for accurate periodontal and peri-implant diagnosis. It provides a chronological overview of the assessment phase of care, including identifying, diagnosing, communicating, treating, and stabilizing periodontitis through non-surgical periodontal therapy. The course will also review the latest 2023 implant maintenance guidelines, focusing on prevention, early detection, and management of peri-implant conditions.

The second half of the seminar will introduce the fundamentals of orofacial myofunctional therapy (OMT) and its role in airway-centered, physiologic care. Attendees will explore how myofunctional dysfunction impacts oral and systemic health and understand when to integrate or refer for therapy.

Course Topic Outline

3 hours:

- Assessment Phase Components
- Periodontal Classification
- Implants Classification
- Implants Maintenance
- Treatment Planning
- Decision-Making Tree
- Glycine Powder Air Polishing
- Set up for Basic Kit
- Set up for SRP kit

3 hours:

- OMT Basics
- Function
- Dysfunction
- Systemic Links
- Assessment
- Collaboration
- Implementation
- Integration

Aida Bosnjak RDH, OMT, BBPI
